

To our Meet Directors,

We wanted to make you aware of changes Hy-Tek has made to their MEET MANAGER software that may affect how you import and export from DirectAthletics. Effective immediately, Hy-Tek has disabled logging into DirectAthletics directly from Hy-Tek's MEET MANAGER and blocked the use of TCL import.

This does not affect your ability to quickly import entries and rosters from DirectAthletics and upload meet results to DirectAthletics. We have attached detailed instructions on how to import entries using the semi-colon delimited format and upload results using the Hy-Tek TCL file format.

The decision to remove this functionality is Hy-Tek's. Despite our efforts to discourage them from removing these features, they have unfortunately decided that this is what's best for their software and their customers. If you have any questions or concerns about Hy-Tek software, you should contact them at sales@hy-tek.com

We apologize for any inconvenience this may cause.

Thank you and don't hesitate to contact us if you have any questions,

The DirectAthletics Team
